

Who is there?

AI vision models *mostly* through the last 20 years
with emphasis on smart motorways, *when possible*

2009
ImageNet first edition a benchmark
for image recognition

2006
The M42 becomes the first
smart motorway in the UK

1909
The myth of the golem,
a sentient protector

1958
Rosenblatt's mechanical proof,
the perceptron uses a camera
to learn

2012
AlexNet, a CNN architecture
breaks all the records

2017
Transformers introduce attention
as a general modelling principle

2024
E.U. AI Act classifies road-traffic
safety-component AI as high risk

2020
A new framework, DERT:
End-to-End Object Detection
with transformers
