You can submit parts of the literature review for your dissertation (the state of the art section is preferred). You must submit 500 to 800 words, and include the following:
Only sections that discuss the literature and how it relates to your topic will be counted towards the assignment. You can include other sections such as your future plans but it is essential that you critically evaluate and discuss at least three pieces of academic literature.

- Include paraphrased referencing for at least three academic articles.
- Include a quote, but no more than a total of 50 words in the essay should be quotes.
- Reference correctly throughout, using Harvard/Cite it Right
- Include a bibliography, using Harvard/Cite it Right
- Include your name, student ID, date of submission, module and assignment as a header or title page.

2 Literature review

researchrabbit - mapping literature papers and how they connect
anara

***** 2.1 What models have been used?
Ismail Fawaz, H., Lucas, B., Forestier, G. et al. InceptionTime: Finding AlexNet for time series classification. Data Min Knowl Disc 34, 1936–1962 (2020). https://doi.org/10.1007/s10618-020-00710y

- machine learning
- type?
  - reinforcement, frequentist, bayesian, neural network, decision
- architecture?
- applications (eg. health)
- task (eg. classification)

****** top 3 models; 1 line architecture; top 3 applications

2.2 What data preprocessing have been used?
Kleomenis Katevas, Ilias Leontiadis, Martin Pielot, and Joan Serr`a. 2017. Practical Processing of Mobile Sensor Data for Continual Deep Learning Predictions. In Proceedings of the 1st International Workshop on Deep Learning for Mobile Systems and Applications (EMDL '17). Association for Computing Machinery, New York, NY, USA, 19–24.

https://doi.org/10.1145/3089801.3089802
- type of data -- type of models
- size data --- type of models, application
- population specific? -- task dependent?

2.3 What kind of window have been used?
Florian K¨unzler, Varun Mishra, Jan-Niklas Kramer, David Kotz, Elgar Fleisch, and Tobias Kowatsch. 2020. Exploring the State-of-Receptivity for mHealth Interventions. Proc. ACM Interact. Mob. Wearable Ubiquitous Technol. 3, 4, Article 140 (December 2019), 27 pages.
https://doi.org/10.1145/3369805
- types --- application,
- version
- skill level operator

"You will also draft an initial literature review outline, which includes your chapter headers, subchapter headers and 1-2 sentences per subchapter for the Introduction and Literature Review chapters. "
